(a) phase step at the dip
density
phase step across the dip |Δφ| (rad)
two-phasor null (n=4699)
amplitude modulation (n=998)
measured (Lei) (n=1231)
(b) depth dependence
|Δφ| (rad), median and IQR
dip depth 1 − |z|/median
measured (Lei)
two-phasor null
amplitude modulation
<0.65
0.65-0.8
0.8-0.9
>0.9
